

ReelCLEANER

ReelCleaner is used for cleaning the connector's ferrule. The optical technology uses the Ferrule tip as a contact point between the optical fibres. Cleaning the Ferrule is therefore very important for preventing signal errors. ReelCleaner is delivered in two editions, h.v. with single or double track.

- Provides very good sanitation without scratching
- Injure no fibre
- Dry cleaning process (non-alcoholic)
- Anti-static finish gives less dust
- Easy to switch refills
- 400 + pc. cleansing surveys / refill

Dimensions and characteristics

| | |
