

Video Transmission

Fibrbridge develops and produces systems of very high quality for transmission of video over single-mode or multi mode fibre. It can approximately transmitt video with a 8, 10, or 16 bit's coding, 8MHz bandwidth, and S/N> 60dB in broadcast quality. The transmission distance can be set up to 4km on the multi-mode fibre and 120km of single-mode fibre. The equipment can be supplied both as stand-alone devices and as subrack modules.

- Multi Mode and Single-mode
- Video Multiplexing
- Video + audio + data + ethernet
- Stand-alone or rack mounted
- Exceeds EIA 250C medium-haul standard
- Uncompressed video with 8, 10 or 16 bit signal
- 8MHz bandwidth, compatible with NTSC, PAL and SECAM
- hardened variants for mounting outdoors
